To whom it may concern,

Project Liubov - Love has been working for 15 years to provide aid and assistance to the most vulnerable in Ukraine's society - the children and youth. As a Canadian project and one that is under the umbrella of the Canada - Ukraine Foundation, we have over the past 18 months been asked to aid the Vynnyky project for refugees transferred here from the city of Luhansk and other eastern Ukrainian centres.

So far we have sent some 63 parcels (approximately 1000 kilograms) of clothing, footwear, school supplies and recreational supplies for the children and youth for Teenagerfund. In addition we have forwarded four project grants to get them Lviv refugees camp started in their various endeavours of survival. This camp is an outstanding example how Ukrainians from the eastern war zone have resettled into western Ukraine and have with love and charity reestablished their lives to continue to be productive citizens of a free and independent country called Ukraine. The example of this camp is truly a miracle – surviving as internal refugees in Ukraine.

The leadership of the Charitable organization "Lviv regional charitable foundation "Teenager" under Serhiy Popov should be seen as dedicated survivors and models for other NGO in Ukraine. Their dedication and organization skills are first class and speak highly about what role the not for profit sector NGOs can play in Ukraine.

Our project and I wholeheartedly support the Teenagerfund and its leadership to provide a future for the IDPs children and youth of war torn Ukraine.

With sincere greetings,

Roman Yereniuk
